

Like in any relationship,
when communication fails
in your company - so do
you!

Lantana would like to introduce you to a new kind of “couples therapy” ...

Avaya IP Office helps your business manage communications while measuring customer support, maximizing productivity and integrating applications. It delivers advanced telephony, messaging, and conferencing to office and mobile employees, to clients, suppliers, and partners. [Watch demo now.](#)

Lower mobile phone and long-distance bills
IP Office helps reduce mobile phone and long-distance charges by routing calls through the system and over broadband links.

Built-in resiliency
For businesses with more than one location, IP Office delivers continuous operation. In a power outage, IP phones automatically failover to another location, retaining full communications capabilities.

No conference calling fees
IP Office makes conferencing affordable and practical by providing two built-in, 64-party conference bridges.

Centralized administration
IP Office enables remote management and administration from a central location. No need to have an administrator at every site. With advanced diagnostics, IP Office proactively identifies potential problems before they cause an outage or business disruption.

Avaya IP Office

Keep the communication open...

- Establish a “personal number” that automatically forwards calls to a mobile, home or other phone
- Screen out unnecessary calls
- Have calls and messages routed to you as e-mail text
- Increase your mobility when you dial out from anywhere without affecting your caller ID

It doesn't have to be difficult.

- Manage the entire communications system from one location via single web browser interface
- Simplify the job by quickly setting up distribution lists for voice mails and e-mails through a single interface

Lantana COUNT ON US TO BE THERE!
